Why Us?

Experience

We are amongst the handful of original mobile and Facebook application developers that have been around ever since the iPhone and Facebook's API were launched

Versatility

From simple utility mobile apps and Facebook contest apps to large scale multi player real time games; from custom web solutions to eCommerce platforms and entire product development, we've done it all

Originality

We are fully aware of how hard it is to stand out online, so we have got the perfect team with a proven mix of skills that ensure the highest level of visibility and affinity

Diversity

Not only in our workforce but in the things we do. Watching developers take sides in our office is no joke

Consistency

Our clients are more than just clients; they are part of the Social Cubix family, and that means an assurance that we will stand by them. This includes 30 days of free post-launch application support

Support & Warranty

We aim to build long term relationships with our project executions in addition to the end product. After you have launched your application, we provide sustained support to ensure that you do not walk alone

FREE 60 day support and warranty

Discounted hourly rates for on-demand application maintenance beyond 60 days

Protection Advantage

In the unlikely event that your project goes awry, you are covered up to **\$750,000** with our Professional Liability Insurance policy

Incomplete project based on negligence on our part for not implementing features stated in the Statement of Work (SOW)

Loss of revenue on client's part due to late delivery of final contracted product

Third party claims arising from Social Cubix's use of copyrighted software in the execution of your project (up to \$200,000)

Global Protection as long as the claim is filed in the USA

Claims for damages up to \$250,000 in punitive damages as allowed by law
